Portfolio Website	: https://cynthia211588.github.io/portfolio-cynthia/
GitHub	: https://github.com/Cynthia211588
Permanent Address	: Sungai Long, Selangor, Malaysia
Age	: 22
Nationality	: Malaysian

OBJECTIVE

Fresh Software Engineering graduate seeking an entry-level opportunity in the software and IT industry. Hands-on experience in software development, web technologies, databases, and cloud deployment, with strong adaptability and willingness to learn. Available to start immediately.

EDUCATION

Oct 2023 – Oct 2026
Bachelor of Science (Honours) Software Engineering,
Universiti Tunku Abdul Rahman, Sungai Long, Malaysia
CGPA: 3.4956/4.00 (Final result pending)

Sep 2022 – Sep 2023
Foundation in Science (Health Science),
SEGi University Kota Damansara, Selangor
Cumulative Grade Point Average (CGPA): 3.54/4.00

2017 - 2021
Malaysian Certificate of Education (SPM),
SMK Lanang, Sibu, Sarawak
2A+, 3A, 4A-, 1B+ (Science Stream)

WORK EXPERIENCE

Oct 2025 – Jan 2026
Backend Developer Intern
Webby Sdn Bhd, Malaysia

- Developed backend features and APIs using PHP Laravel, GraphQL and MySQL for member, reward, wallet and tier-related modules.
- Implemented CRUD operations, validation and business logic within a multi-tenant database architecture.
- Developed scheduled backend processes including wallet expiration, member updates and tier recalculation.
- Performed API testing using GraphiQL and Altair, resolved backend issues, and collaborated through Git/GitHub.

Jan & June 2025
Part-Time Piano Teacher
Sibu, Sarawak

- Developed communication and interpersonal skills through one-to-one teaching.

ACADEMIC PROJECT

1. **Badminton Smash Analysis and Feedback System**
   Final Year Project | Python, OpenCV, MediaPipe Pose
   - Developed a computer vision system to analyse badminton smash movements and calculate key joint angles from uploaded videos.
   - Compared detected movements against benchmark thresholds to generate colour-coded visual feedback and improvement suggestions.

2. **Hotel Management System & AWS Cloud Deployment**
   Laravel, PHP, MySQL, AWS EC2, RDS, S3, Elastic Beanstalk
   - Developed a database-driven hotel management web application using Laravel and MySQL.
   - Deployed the application using EC2, RDS, S3 and Elastic Beanstalk, with VPC, subnet and security group configuration.

3. **Nutrition Tracker**
   AI Innovation Hackathon | Frontend Development & Software Testing
   - Collaborated in developing a nutrition and dietary tracking application.
   - Contributed to frontend implementation and conducted functional and usability testing.

4. **Restaurant Ordering Mobile Application**
   React Native, JavaScript
   - Developed a cross-platform mobile application for browsing menu items and placing restaurant orders.
   - Implemented and tested mobile interfaces and user interactions.

5. **X's Adventure**
   2D Puzzle Platformer | Godot Engine, GDScript, Git & GitHub
   - Developed core player mechanics including movement, jumping, hazard respawning, Camera2D tracking and box-pushing physics.
   - Designed and implemented a puzzle-based level featuring lever interactions, balance-beam mechanics and environmental obstacles.

ACHIEVEMENTS & REWARDS

Sep 2026 — **Top 20 Shortlisted Project, FYP Poster Competition**
- Selected as one of the Top 20 Software Engineering final-year project posters.
- Presented "A Computer Vision-Based System for Badminton Smash Analysis and Feedback" to a panel of judges.

Mar 2026 — **AI Innovation Grand Champion, AI Innovation Hackathon**
- Won Grand Champion among 10 teams from UTAR Sungai Long and Kampar campuses.
- Developed Nutrition Tracker as part of a team, contributing to frontend development and software testing.

Feb 2026	**Dean's List — Bachelor of Science (Honours) Software Engineering** • GPA: 3.7300/4.00
Jun 2025	**Dean's List — Bachelor of Science (Honours) Software Engineering** • GPA: 3.6289/4.00
June 2023	**Dean List Recipient** • Foundation in Science • GPA: 3.60/4.00
Dec 2019	**Trinity College London Grade 8 Piano** • Passed with Merit

SKILLS

Programming	**:** PHP, JavaScript, Python, Java, C++, HTML, CSS
Frameworks & Technologies	**:** Laravel, React Native, GraphQL, MediaPipe Pose, OpenCV
Database	**:** MySQL, SQL
Cloud	**:** AWS EC2, RDS, S3, Elastic Beanstalk
Tools	**:** Git, GitHub, GraphiQL, Altair, Axure RP
Development	**:** API Development, CRUD Operations, Software Testing
Languages	**:** Chinese, English, Malay
